Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

- 1. The Final Rejection of 03/15/04 has been removed and this application is subject to further prosecution on the merits.**

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:**

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

- 2. Claims 15-23, 25-30, 34 and 36 are rejected under 35 U.S.C.**

103(a) as being unpatentable over Britton, of record.

- 3. Patentees disclose making a foamed composition containing an active ingredient of the claimed type (col. 6 lines 29-41) and said foam is adapted for stability upon contact with air and instability upon contact with water. Note that the working examples show aqueous dissolution of stable foam containing controlled release of an active ingredient.**

Art Unit: 1711

4. While the instant claims call for a particle having a mean size range, note that on page 18 of the instant specification such mean size is merely described as preferred, which is not deemed to be critical limitation. And since the reference refers to the active ingredient is a controlled release agent there would be motivation for patentees to make the active agent as uniform a size range to permit controlled release of the active agent. In any case there is no factual comparative evidence in the record to show unexpected results to accrue from the claimed range.

5. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.**
- 2. Ascertaining the differences between the prior art and the claims at issue.**
- 3. Resolving the level of ordinary skill in the pertinent art.**
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.**
